Jalevel Meso Hair Treatment

MESOTHERAPY STERILE COCKTAILS

UK
JALEVEL® HYDRAVIT
1 vial x 5ml

Main Ingredients:
Aqua, Hyaluronic Acid (HA), BnOH, Vitamins & Oligoelements, Amino Acids.

This highly active multi-component vitamin solution is targeted to significantly remedy ageing skin. HA helps the skin to restore the hydration levels. Vitamins and oligo-elements contribute to proper cellular metabolic activity and provide favourable conditions for all important biochemical processes to flow smoothly. Amino acids contribute to the synthesis of new collagen and elastin production. As a result, the skin regains its density, elasticity, radiance and youthfulness. Jalevel® Meso HydraVit can be used to treat any part of the body skin which needs revitalization, moisturizing and rejuvenation.

Indications:
- Skin with first signs of ageing (fine lines & wrinkles)
- Skin lacking in elasticity & firmness
- Dry/dehydrated skin
- Tired/dull skin
- Rosacea/Couperose
- Recovery of ‘stressful’ skin, with chronic fatigue syndrome
- Anti-oxidant effect
JALEVEL® LIFT PLUS
1 vial x 5ml

Main Ingredients:
Aqua, DMAE, Ascorbic Acid, BnOH

This Meso Cocktail is an instant ‘facelift’. DMAE is a well known mesotherapy active ingredient recognised for its toning and lifting properties. It also stimulates collagen, elastin and hyaluronic acid production. Vitamin C lightens the skin and tightens the pores thus giving the skin a radiant look.

The result is obvious after just one procedure — skin elasticity and tone are dramatically improved.

Indications:
- Dry/dehydrated skin
- Fine lines and wrinkles
- Tired/dull skin
- Saggy/skin lacking elasticity
- Neck and décolleté skin rejuvenation
- Facial contour restoration
JALEVEL® WHITE
1 vial x 5ml

Main Ingredients:
Aqua, Sodium Chloride, Ascorbic Acid, Niacinamide, Glutathione Reduced, BnOH

This cocktail is designed to treat any type of pigmentation. It has three active ingredients – Vitamin C, nicotinamide and glutathione – all well-known for their lightening properties. Vitamin C is a potent antioxidant that prevents further development of unwanted pigmentation. It also stimulates collagen production and promotes skin rejuvenation. Nicotinamide improves microcirculation, smoothes the texture of the skin and returns to it the correct structure. Glutathione restores oxidative processes and protects the skin from free radicals damage. The combination of the active ingredients return a smooth and even tone to the skin with a radiant and healthy appearance.

Indications:
- Hyperpigmentation
- Melasma
- Chloasma
- Pigmented spots
- Irregular skin tone
- Post-acne treatment (acne scarring)
- Conditioning for oily skin, tightening effect on enlarged pores
Main Ingredients:
Aqua, Caffeine, Mannitol, Nicotinamide, Tween, BnOH.

This cocktail is an universal lipolytic solution which is designed to treat fat deposits on the face and body. The special composition of ingredients accelerates metabolism, promotes lipolysis of fat cells and has a drainage effect. Caffeine accelerates the breakdown of fats and quickly utilizes fat deposits, giving the skin elasticity. Mannitol has a detoxifying property which effectively removes excess fluid from the tissues. Nicotinamide increases blood microcirculation, thus improving the overall metabolism of the tissue. Tween is needed for the lipolysis process.

Meso Slim System is ideal to treat cellulite and water retention in the body.

Indications:
- Excess fat deposits on the face and body
- Water retention in the face and body
- Puffiness of lower eyelids
- ‘Double’ chin
- Edematous Cellulite
**JALEVEL® BODY CONTOUR**
1 vial x 5ml

**Main Ingredients:**
Aqua, Sodium Deoxycholate, Phosphatidylcholine, BnOH

This is an ideal meso cocktail for active adipose tissue lipolysis. Deoxycholate is a direct lipolytic that has the ability to destroy the lipid membrane of fat cells, thus reducing the number of ‘fatty’ cells. Phosphotidylcholine contributes to the transformation of fatty acids into energy.

It is recommended for the therapy of fibrous cellulite and reduction of subcutaneous fat.

Jalevel® Meso Body Contour is designed exclusively for lipolytic body procedures, to reduce fat deposits on abdomen, back, hips.

**Indications:**
- Fat deposits in the abdominal, hips, sides areas
- Fibrous cellulite
**JALEVEL® HAIR TREATMENT**

1 vial x 5ml

**Main Ingredients:**
Aqua, Sodium Chloride, D-Pantothenic Acid, Pyridoxine HCl, L-Cysteine, Biotin, BnOH

This is a trichological solution is designed to treat hair loss, improve hair growth, structure and condition the scalp. Vitamin B5 regulates and normalizes cellular metabolism. Pyridoxine accelerates hair growth. L – Cysteine ensures the correct structure and density of the hair. Biotin regulates the metabolic processes and has anti-inflammatory properties.

It is also ideal for the treatment of dandruff, excessively oily scalp, seborrheic dermatitis & alopecia.

**Indications:**
- Non- androgenic alopecia (hair loss)
- Weak hair structure and growth
- Dandruff/Seborrhea and excessively oily scalp
- Facial hair treatment (beard, eyebrows)
